

1. Escalator Information

Location: _____

Manufacturer: _____

Model: _____

ID or Contract Number: _____

Total Number of Visible Steps: _____ (include each step partially hidden by the comb as one full step – required to calculate rise)

Holders: SILVER BLACK (please check box)

For assistance with this form, call 1-800-490-7915 Monday to Friday 8:00am to 4:30 pm EST or 1-905-431-6103 after hours.

2. Measuring Landing Areas

Measure the step height from one step to the next and record the dimensions inside the step. For lower landing, measure the rise from the previous step. For upper landing, measure the drop from the previous step. Measurements should be within 1mm or 1/16 of an inch. (See example, bottom right.)

lower landing (rise)

A Measure and record the distance from the comb root to the edge of the last flat step.

Measure and record the distance from the comb root to the edge of the last flat step.

B upper landing (drop)

step width

Measure and record the tread depth of one FULL step.

example

3. Skirt Panel Measurements

Choose the diagram that best resembles the escalator and document the dimensions measured vertically above the step nose. If none of the drawings resemble the skirting, sketch and document the dimensions in the space provided. (Dimensions within 1 mm or 1/16 inch.)
